

TOMASZ KACZMAREK

SOFTWARE DEVELOPER

Address: Sutton-in-Ashfield, United Kingdom • **Email address:** tomasz.m.kaczmarek@gmail.com

Portfolio: <https://tkaczmarek.dev> • **Linkedin:** www.linkedin.com/in/tomkacdev • **Phone number:** +44 7535 623284

PROFESSIONAL SUMMARY

Software Developer focused on **backend** development with practical experience in **C#, .NET, ASP.NET Core, SQL Server, Entity Framework** and **REST API** development. Currently gaining commercial experience as a **C#/.NET Developer Intern** while completing a **Bachelor's degree** in **Software Engineering**. Academic and portfolio work includes **web, desktop, API-based** and **mobile applications**, including **React Native** projects supported by backend services and database-driven architecture.

WORK EXPERIENCE

C# / .NET Developer Intern

11/2025 - Present

Centre for Research and Programming (CBiP)

Working within a development team supporting backend services, REST API functionality and database-driven features using C#, ASP.NET Core, SQL Server and Entity Framework. The role involves improving existing code, building API endpoints, supporting frontend integration, debugging system behaviour and contributing to Agile/Scrum delivery.

- Improved backend maintainability by refactoring **C#/.NET** components and reviewing existing **API logic**.
- Implemented **REST API endpoints** supporting frontend integration and system feature development.
- Supported database-driven functionality using **SQL Server** and **Entity Framework**.
- Improved API reliability by testing endpoints with **Swagger**, analysing logs and resolving backend issues.
- Contributed to **Agile/Scrum** delivery through sprint planning, stand-ups, retrospectives, documentation, deployment support and technical research.

Warehouse Operative

12/2018 - Present

Alloga UK

- Supporting warehouse operations, documentation and communication in a logistics environment.
- Covered Loading Controller duties, including yard coordination and communication with drivers and supervisors.

EDUCATION

Bachelor of Engineering (BEng) in Software Engineering (IN-PROGRESS)

10/2023 - Present
Nowy Sacz, Poland

Wyższa Szkoła Biznesu - National Louis University

- Focus on software engineering, backend development, and full-cycle application development.
- Covered areas including programming, databases, software architecture, and networking fundamentals
- Worked on practical projects using modern technologies and Agile methodologies

General Secondary Education (Polish A-level equivalent)

09/2014 - 06/2017
Wojnicz, Poland

- Advanced-level subjects: Mathematics and English.

PROJECTS

Virtual University API

C# / .NET, SQL, REST API

Backend-focused API project designed to support core virtual university functionality, authentication-related features, structured data handling and frontend integration. The project strengthened practical experience in REST API design, SQL-based persistence and organised backend architecture.

- Delivered REST API functionality supporting platform features and frontend communication.
- Improved backend structure through cleaner code organisation and separation of responsibilities.
- Strengthened practical experience in C#/.NET, SQL, API design and Agile-style development.

PrestivaCars - Mobile Business Application (IN-PROGRESS)

React Native, TypeScript, .NET Web API, MediatR, CQRS, Entity Framework Core, Clean Architecture, Docker

Full-stack mobile business application developed to manage car-related business operations through a React Native client and .NET Web API backend. The backend follows a layered Clean Architecture structure with separate API, Application, Domain and Infrastructure projects, using CQRS-style commands and queries with MediatR.

- Building the application structure across mobile and backend layers.
- Implementing CQRS-style commands and queries using MediatR.
- Developing REST API endpoints for vehicle and category management.
- Structuring the backend into API, Application, Domain and Infrastructure layers.

BizCon – Business Management System

C#, WPF, MVVM, SQL Server

Desktop business management system built with C#, WPF and MVVM pattern to support structured management of business-related data. The project focused on maintainable application design, database integration and clear separation of responsibilities across the user interface, business logic and data layer.

- Developed a desktop business management application using WPF and MVVM architecture
- Designed and implemented application logic with clear separation of concerns
- Integrated SQL Server database for persistent data storage
- Built modular system structure simulating real-world business operations

More projects available on my portfolio: <https://tkaczmarek.dev>

SKILLS

- **Backend & Programming:**
C# | .NET | PHP | SQL | REST API Development
- **Frameworks & Libraries:**
ASP.NET Core | Laravel | Entity Framework | React | React Native | Next.js | Node.js | Tailwind CSS
- **Architecture & Methodologies:**
Object-Oriented Programming (OOP) | MVC | CQRS | MVVM | Agile / Scrum | Clean Code Principles | UML
- **Frontend & Web:**
JavaScript | TypeScript | HTML | XAML | CSS
- **Tools & Development:**
Git / GitHub | Docker | Visual Studio | VS Code | SSMS | Swagger | Debugging & Testing | Jira | Browser DevTools
- **Additional Knowledge:**
Networking fundamentals (TCP/IP, DNS, IPv4/IPv6, Network Topology) | Windows | Virtual Machines | Basic Linux | UI/UX | Responsive Web Design | HCI | Figma | Adobe Photoshop / Illustrator
- **Additional Programming Languages:**
C | C++ | Java (basic, including Swing)
- **Soft Skills:**
Communication | Problem-solving | Teamwork | Adaptability | Time management | Attention to detail

COURSES

- **Development of the digital worker** - Wyższa Szkoła Biznesu - National Louis University
- **C++ for Programmers** - Codecademy
- **Analyze Data with SQL** - Codecademy
- **Google Cloud Computing Foundations: Cloud Computing Fundamentals** - Google
- **Introduction to Artificial Intelligence** - Wyższa Szkoła Biznesu - National Louis University
